Baltimore, MD

EXPERIENCE

100 DEVS, Remote — Frontend & Web Developer (Apprentice)

OCTOBER 2025 - PRESENT

Develop responsive web applications from scratch using semantically structured HTML5, modern CSS3 layouts (Flexbox/Grid), and

JavaScript. **Transform** design concepts into interactive, accessible user interfaces following mobile-first and cross-browser compatibility standards.

Drive programmatic logic using JavaScript to handle user events, manipulate the DOM, and create dynamic client-side features.

Partner within a technical community of developers, participating in active peer code reviews and troubleshooting engineering concepts.

Freelance Web Consultant, Baltimore MD

JANUARY 2026 - PRESENT

Deliver tailored web solutions for clients using semantic HTML5, modern CSS3, and JavaScript to match unique business requirements.

Enhance digital interfaces for mobile responsiveness and fast loading speeds, significantly improving user engagement and retention.

Advise clients directly to translate brand visions into functional websites, providing post-launch support and technical troubleshooting.
